

Intellectual capital sets you apart – but only if you can find it.

eVestment Research Management centralizes your manager research – from meeting notes and emails to performance reports and analyst assessments. A simple search pulls up all your intellectual property on a given topic, asset class or manager. And automation allows you to track review workflows and deadlines, all with an audit trail.

TODAY

Shared Folders

Flat structure with search
in one folder at a time

IP dispersed across folders, drives,
sites and even individual laptops

No audit trail or tracking

IP is lost when analysts leave

VS

TOMORROW

Operational Efficiency with Research Management

Multidimensional structure that allows
search across many attributes

IP is centralized in one place

Auditing and tracking

Firm IP is preserved

Say Goodbye To Your S:/Drive.
