## USE RESEARCH MANAGEMENT TO

### **Centralize your manager research assets.**

Findability sounds like a tech term, but it's actually a problem many research teams face everyday. They know they have deep research on a strategy or manager, but it's just not findable. It's hidden on a chaotic shared drive or dispersed across analysts.

### **Bring efficiency to your research process.**

Your research team has a well defined due-diligence process for screening managers, but you're still relying on emails to remind people of review deadlines or pending approvals. Automated workflow frees you to do what you do best — research, analyze and think — and lets technology take care of reminders to Kevin.

### **Meet compliance requirements.**

With a platform expressly designed by former consultants for manager research, your documents, notes, reviews and workflows are always compliance-ready, in a centralized place.

**Store, organize and track  
your manager research:**
